

CLAIMS

1. An accessory in the nature of a mitt for covering a bristled brush used for cleaning the finish of a vehicle or the like, said mitt comprising:

5 a tube of soft pliable material, said tube having an opening formed therein, said opening being of such size as to receive a bristled brush therethrough such that said material completely covers the bristles of the brush;

a closure for securing said tube about the brush; and

10 a series of openings in said material in proximity to the bristles of the brush to permit disgorgement of sudsy water in said tube.

2. The accessory of Claim 1, wherein said tube comprises at

least two layers of material.

3. The accessory of Claim 1, wherein said closure is a strap having a hook and loop device for securing said material about the brush.

4. The accessory of Claim 1, wherein said material in proximity to the bristles of the brush prevent the bristles from protruding beyond the
5 boundary of said material to thereby prevent contact between the bristles and the finish of the vehicle to be cleaned.

5. The accessory of Claim 1, wherein the exterior surface of said material covering the bristles of the brush presents a soft smooth surface for cleaning the finish contacted by said material without scratching or marring the finish.

6 . An accessory in the nature of a mitt for covering a bristled brush used for cleaning the finish of a vehicle or the like, said mitt comprising:

a tube of outer material, said tube having a closed end, and an
5 open end opposite said closed end, said tube adapted to fit about a bristled brush completely covering the bristles thereof;

an inner layer of material interfaced with said outer layer of material;

a closure for securing said tube about the brush; and
10 a series of openings in said inner and outer materials in proximity to the bristles of the brush to permit disgorgement of sudsy water in said tube without permitting the bristles to come into contact with the finish to be cleaned.

7. The accessory of Claim 6, wherein said closure is a strap having a hook and loop device for securing said material about the brush.

8. The accessory of Claim 6, wherein said material in proximity to the bristles of the brush prevent the bristles from protruding beyond the
5 boundary of said material to thereby prevent contact between the bristles and the finish of the vehicle to be cleaned.

9. The accessory of Claim 6, wherein the exterior surface of said material covering the bristles of the brush presents a soft smooth surface for cleaning the finish contacted by said material without scratching or marring the finish.
